

Pre-Announcement of a co-funded Call for Transnational Collaborative Research Projects: “International Coordination of Research on Infectious Animal Diseases (ICRAD)”

The ERA-NET Cofund International Coordination of Research on Infectious Animal Diseases (ICRAD) is a new ERA-Net Cofund Action under Horizon 2020 that will build upon the achievements of the ERA-NET EMIDA (Emerging and Major Infectious Diseases of Animals) and the ERA-NET ANIHWA (Animal Health and Welfare).

The key mission of ICRAD is to:

- support cross-cutting research to improve animal health and welfare, with associated benefits towards public health, the environment and the economy.
- connect research partners with different but complementary scientific and technological expertise to maximise resources and share risks, costs and skills. The partnership between industrial and academic researchers, where appropriate, will improve and accelerate the development of technological solutions for the benefit of animal health and welfare.

Research and innovation jointly funded by the European Commission (EC) and the ICRAD partners would seek concerted approaches towards the development of novel and improved instruments to address and control infectious diseases, particularly regarding novel detection, intervention and prevention strategies.

In light of this, ICRAD announces the upcoming call for joint transnational research projects on animal health. The Joint Call - with an indicative budget of approximately **23.7M€** - brings together twenty-three funding organisations from nineteen countries.

The total available funding sum provided by the ICRAD partners is up to **17M€**. Additionally up to approximately **6.7M€** funding will be available as European Commission top-up.

Country	Funding Organisation	Funding Contact Person	National/regional call contribution Total (M€)
 Belgium	Agency for Innovation and Entrepreneurship – Flanders (VLAIO)	Kirezi Kanobani +32 2 432 42 11 kirezi.kanobana@vlaio.be	2.0

 United Kingdom	Department for Environment, Food and Rural Affairs (Defra)	Scott Sellers 0208 026 4051 scott.sellers@defra.gov.uk	0.5
Total of national/regional call contributions:			17.29

* The participation of TAGEM and TUBITAK to the first call has to be affirmed - decision presumably until 8th November

	Phase	Date
	Opening date	To be communicated
Pre-proposals	Deadline for submission	Two months after Opening date (TBC)
	Invitation to submit a full proposal	May 2020
Full proposals	Deadline for submission	July 2020
	Communication of the funding decisions	November 2020
Funding decisions and project start	Project start	1 st Quarter 2021

Aim and scope of the call

The overall goal of the ICRAD co-funded call is to support cross-cutting research to improve animal health and by consequence animal welfare, focusing on key epidemic and (re)-emerging threats and developing novel vaccine technology platforms and diagnostics.

The ICRAD co-funded call covers the major groups of infectious diseases of animals (including fishes and bees), and infections by viral, bacterial, parasitic and fungal pathogens, prions, and multifactorial diseases, with particular emphasis on ASF and animal influenza.

The pre-proposals should address one of the following research areas:

- **Research area 1: Improved understanding of epidemic and emerging infectious animal diseases**
- **Research area 2: Generic technology platforms for producing novel and/or improved vaccines**
- **Research area 3: High-throughput, rapid, accurate and easy to use in-field detection technologies**

The following topics will be excluded from funding:

- Research leading to vaccine development for ASF (covered by another EU call: SFS-12-2019: A vaccine against African Swine Fever)
- Food-borne zoonoses (covered by One Health EJP)
- Research on development of new antimicrobials

Eligibility

In this call, ICRAD expects proposals for collaborative research, development and innovation from transnational consortia composed of members from at least three different countries. National and regional eligibility rules must be followed. They will be published together with the call text at: <http://www.submission-icrad.eu>.

Application procedures & Evaluation

In a two-stage submission process, the short pre-proposals will be peer-reviewed after passing an eligibility check. Consortia successfully passing the pre-proposal phase will be invited to submit a full proposal. The full proposals will be evaluated by a panel of independent experts, using the evaluation criteria published with the Call. Projects are expected to start between January 2021 and March 2021 at the latest, depending on grant negotiations with the relevant regional or national funding organisations.
